## NOTHING OBSTRUCTING THE VIEW

Forward, up, back. Any way you look, you'll appreciate the clear, open sightlines of the Core IC Pneumatic. Mast hosing is tucked away, overhead guard bars are oriented for maximum visibility, and the mast crossmember doesn't block your view of the fork tips. The LPG tank bracket keeps a low profile, too. Even the sloped dashboard, and slimmer steering wheel and column lend a hand. Visibility plays a leading role in performance and safety, and the Core IC Pneumatic delivers it like a star.

## STABILITY: NOW AN ACTION VERB

When operators find themselves in uncertain situations, Toyota's System of Active Stability springs into action.

**Active Control Rear Stabilizer** instantly responds to a turn taken too fast by widening the forklift's center of gravity to decrease the likelihood of a lateral tip-over.

**Active Mast Function Controller** automatically overrides operator actions that could cause the forklift to tip forward or backward. Forward tilt control senses unstable load weight and mast height, then acts to limit forward tilt. Rear tilt control slows tilt speed to half, decreasing the chances of spilling unsecured loads or tipping up.

# AN INVESTMENT THAT PAYS YOU BACK

Some competitors are content to design a forklift and build it out with systems bought off the shelf. Toyota demands better for its customers. The Core IC Pneumatic, like all Toyota forklifts, is engineered from the ground up as a finished product. One with better components and well-thought-out integrated systems that work together to deliver intuitive, dependable performance day after day. Toyota forklifts don't require a lot of service. But when they do need service, it's fast and easy — by design. And legendary Toyota quality means more productivity over the lifecycle of your forklift, along with lower repair costs. Higher residual value is another bonus.

## YOUR OUTDOOR WORKHORSE

The Toyota Core IC Pneumatic Forklift is way out front when it comes to accomplishing outdoor material-handling tasks. That's why it's industry's top-selling forklift. And the forklift you should count on, too. Best of all, it's a Toyota — proven the most dependable, reliable and safe line of forklifts you can buy.
